Settings

Real-time protection

Locates and stops malware from installing or running on your device. You can turn off this setting for a short time before it turns back on automatically.

**Real-time protection is off, leaving your device vulnerable.**

Off

Cloud-delivered protection

Provides increased and faster protection with access to the latest protection data in the cloud. Works best with Automatic sample submission turned on.

**Cloud-delivered protection is off. Your device may be vulnerable.**

Off

Automatic sample submission

Send sample files to Microsoft to help protect you and others from potential threats. We'll prompt you if the file we need is likely to contain personal information.

**Automatic sample submission is off. Your device may be vulnerable.**

Off

[Submit a sample manually](#)

Tamper Protection

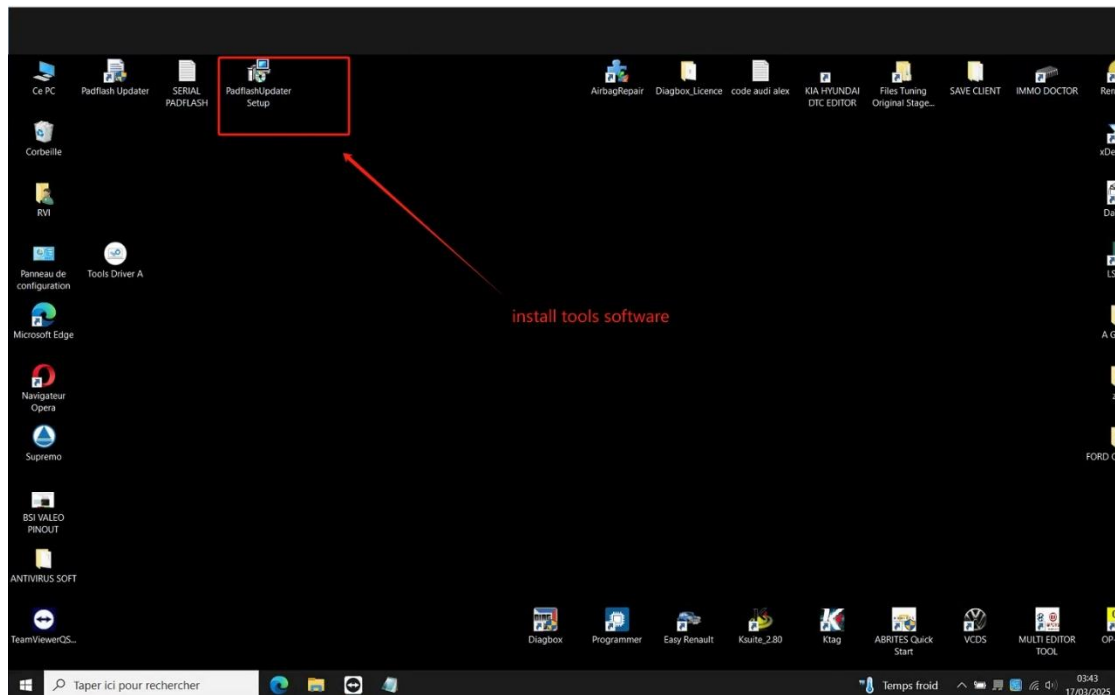

Prevents others from tampering with important security features.

**Tamper protection is off. Your device may be vulnerable.**

4:install padflashr software

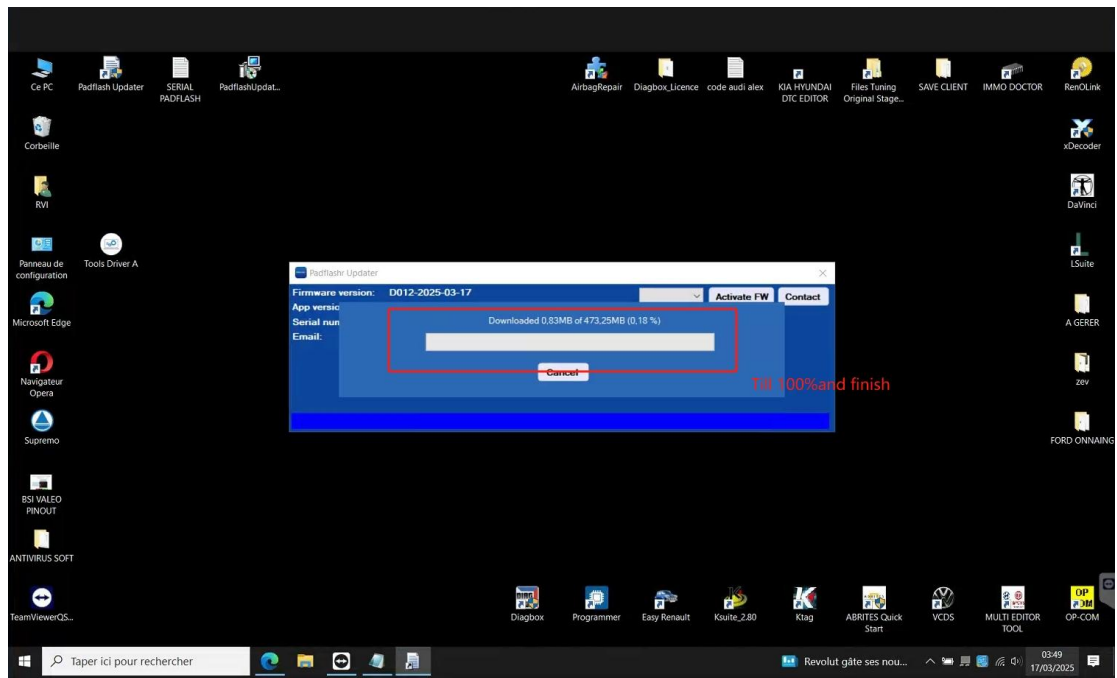

5:write your email and tools serial number for register

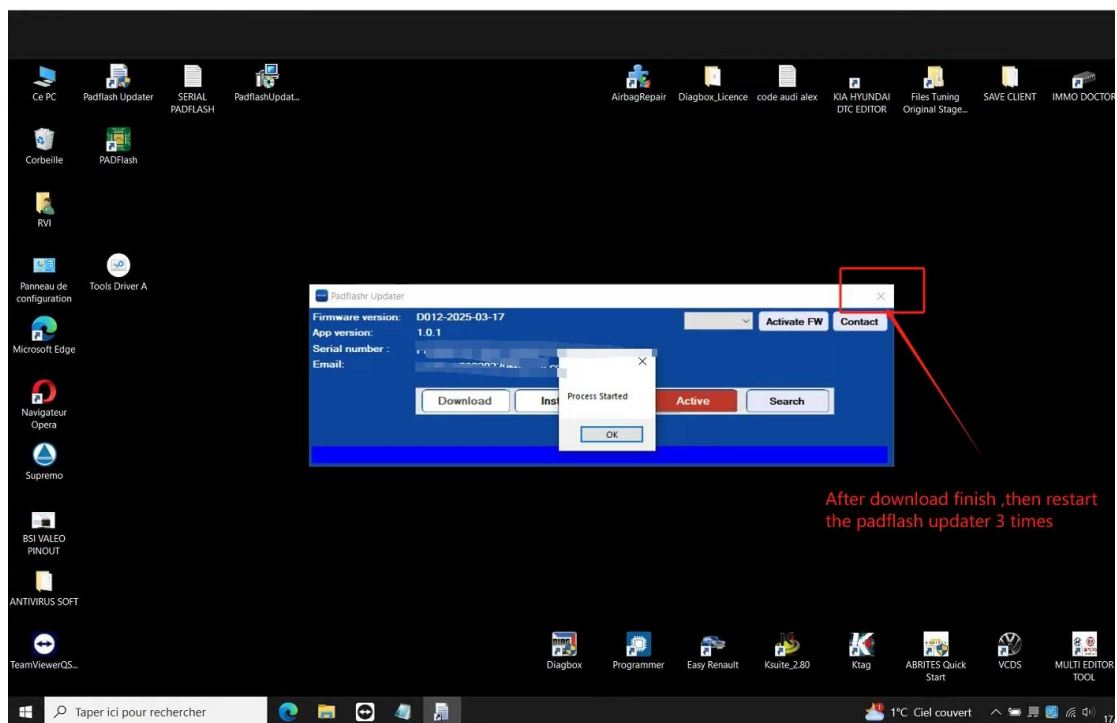

6:restart your padflashr updater after register then download the update files

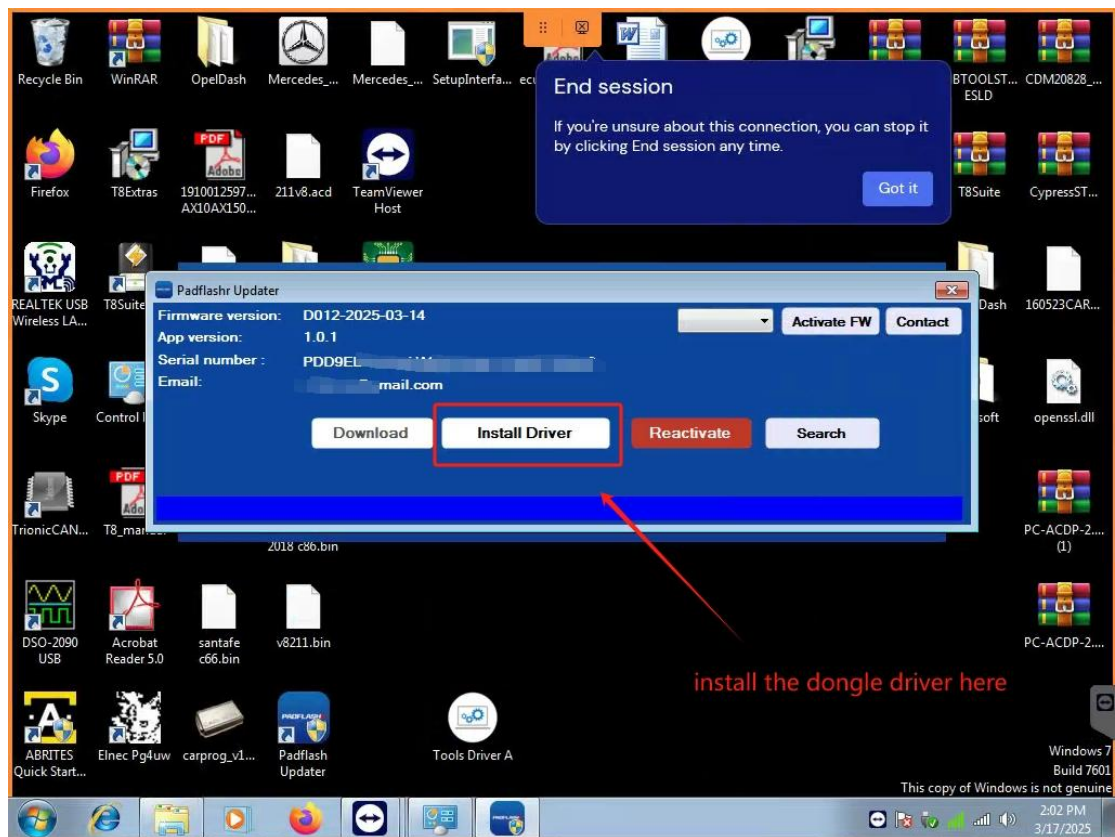

7:wait download finish

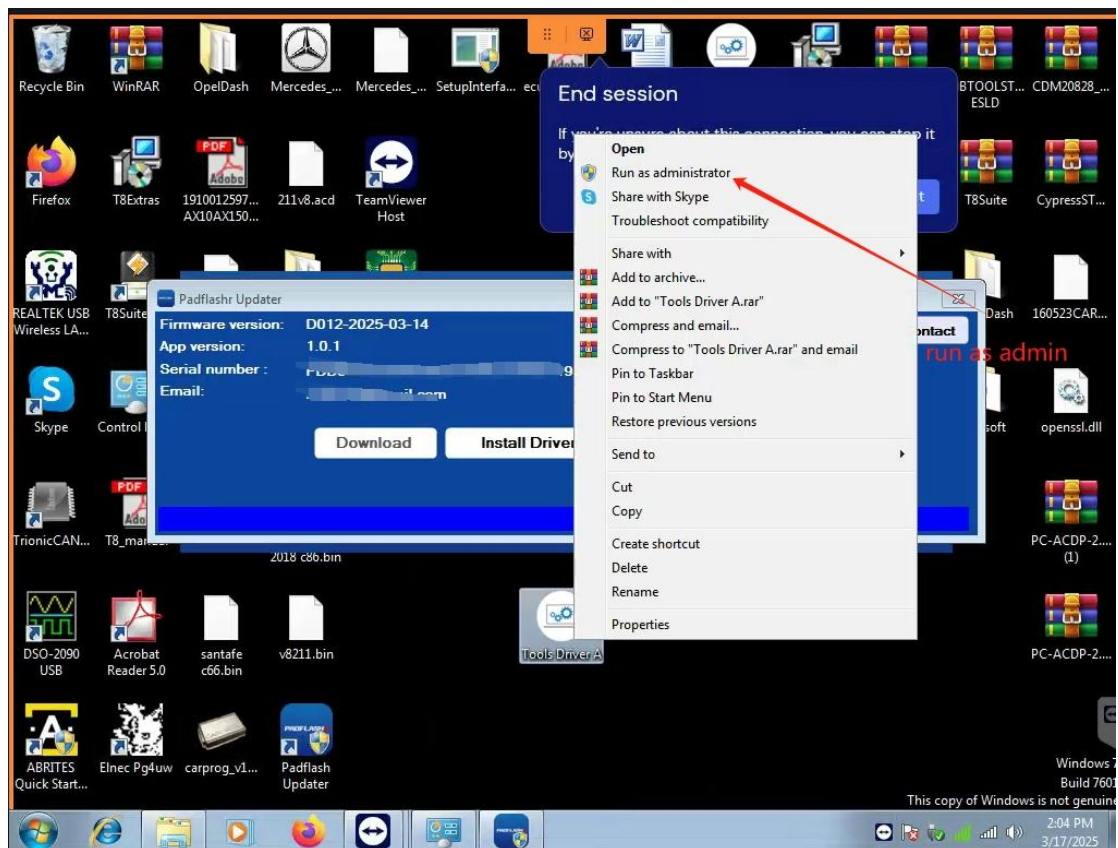

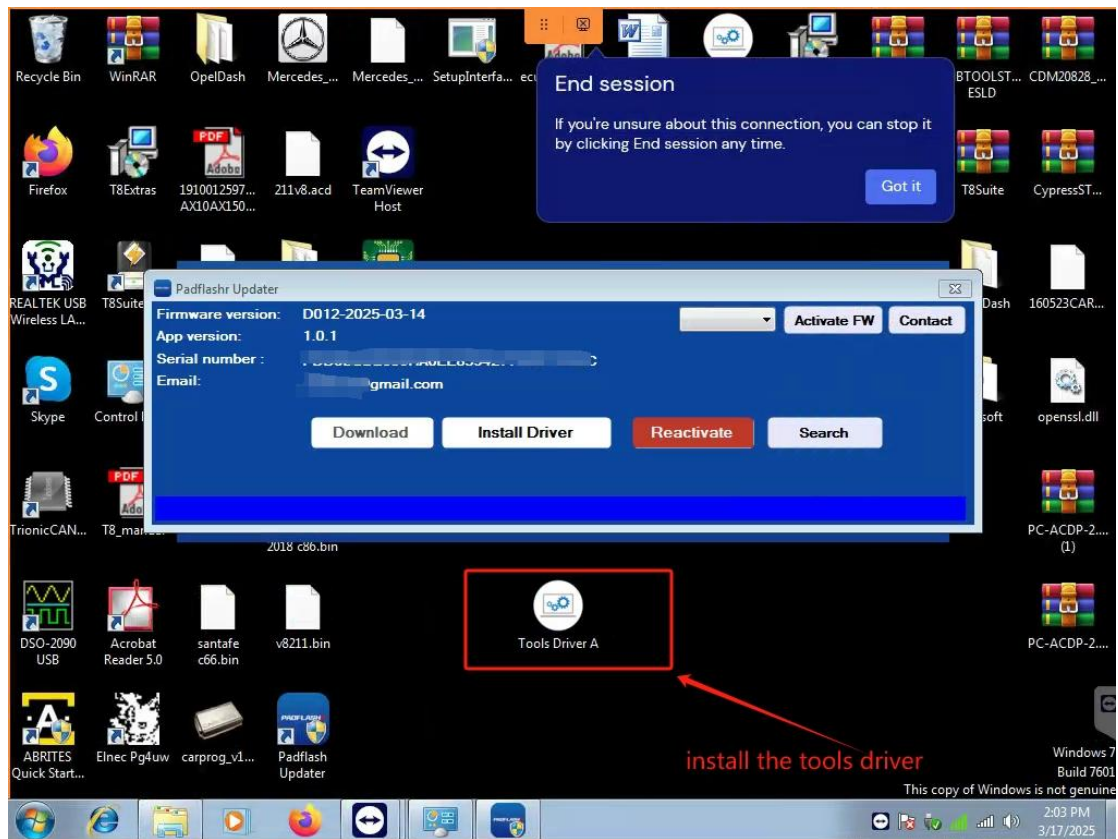

8 after donwnload finish , restart the padflashr updater 3 times

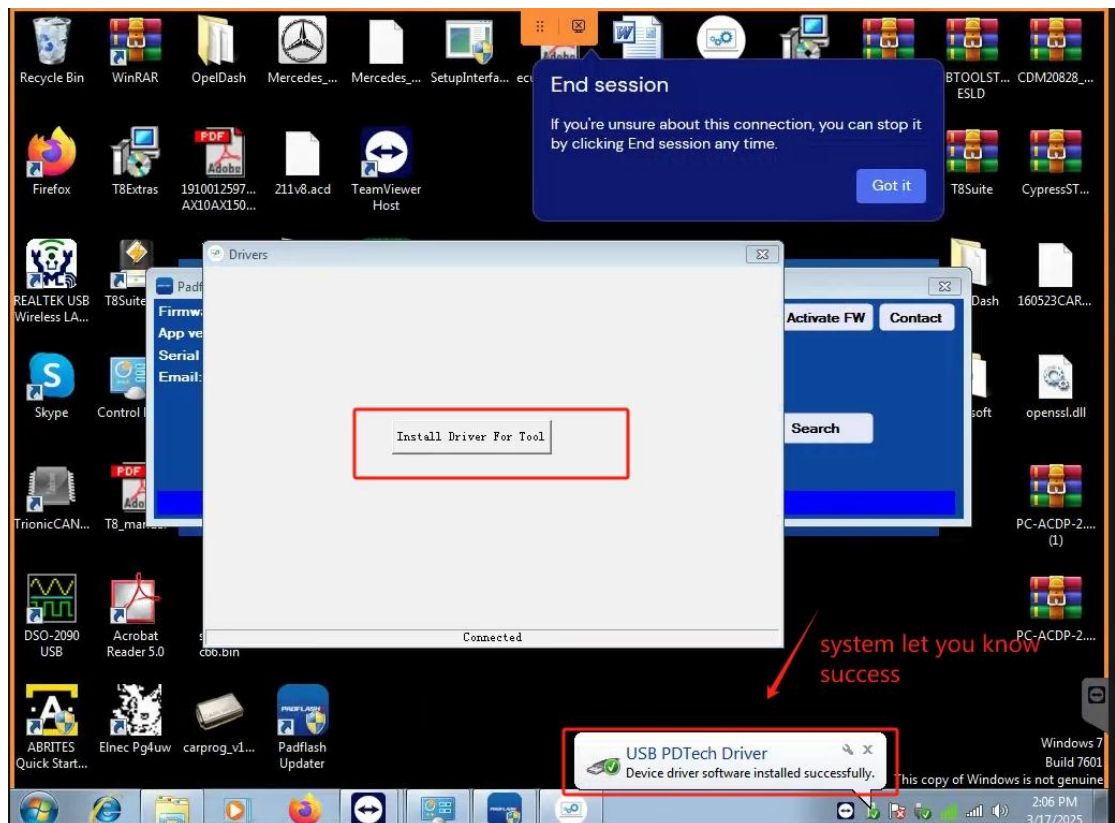

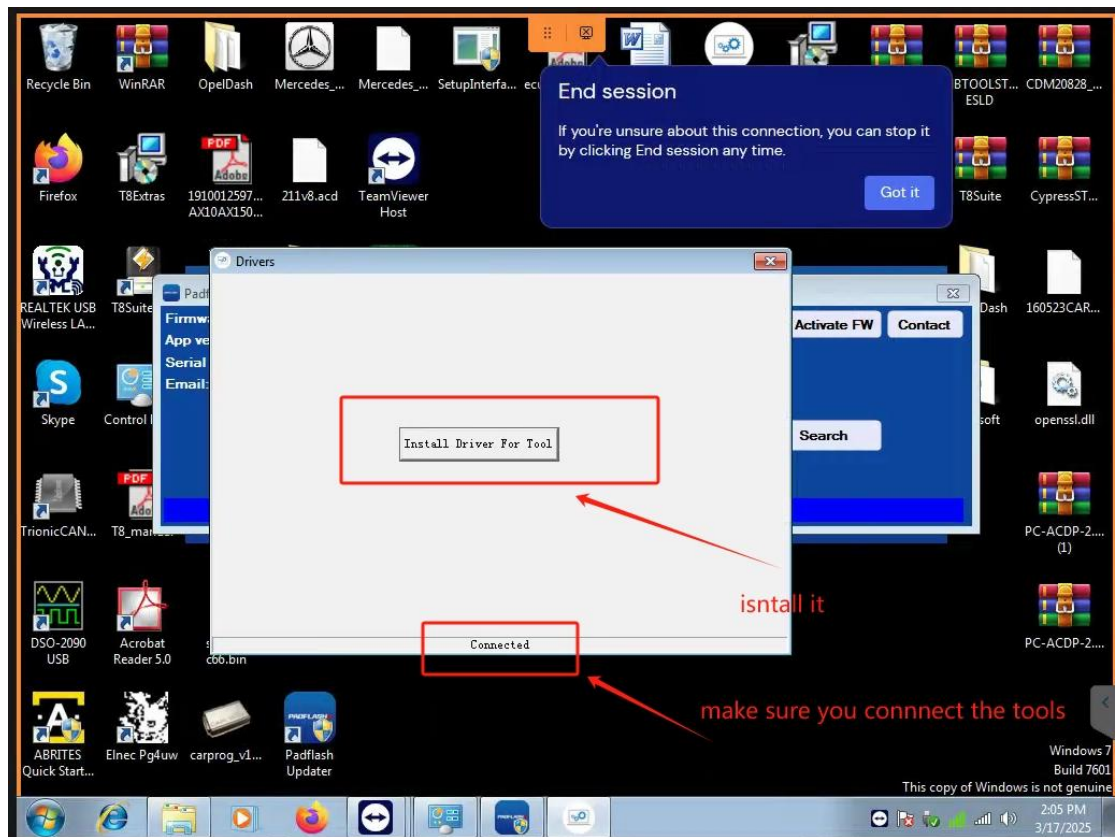

9: connect the tools and dongle install the dongle driver

10:connect the tools and drivers install the tools drivers

!!!!!!Very important things here ,don't miss it !!!!!

Keep your padflashr updater .exe is running , then go to this

folder(C:disk/windows/systembin/pdata)

,set up the padflashr.exe as admin running mode(after set it as admin , then run it as admin mode , it will display a windows ask you input the sn ,so you write your tools big letters sn in it.then login) ,check the picture ,and follow me .

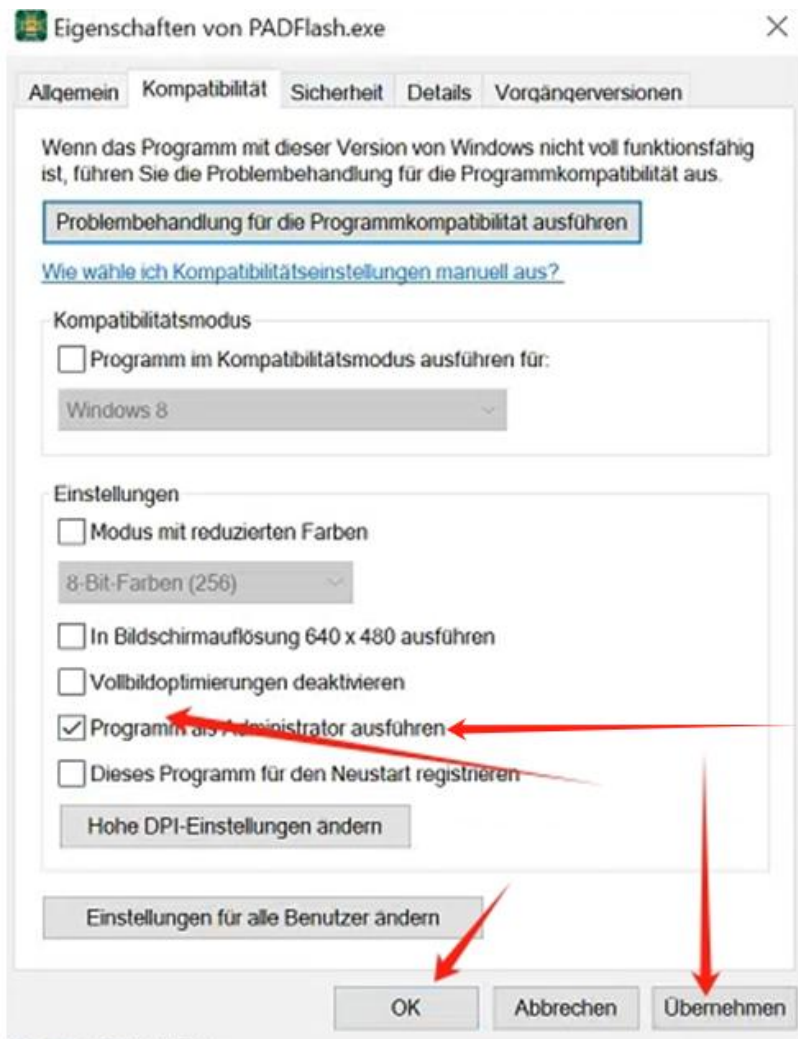

C:disk/windows/systembin/pdata

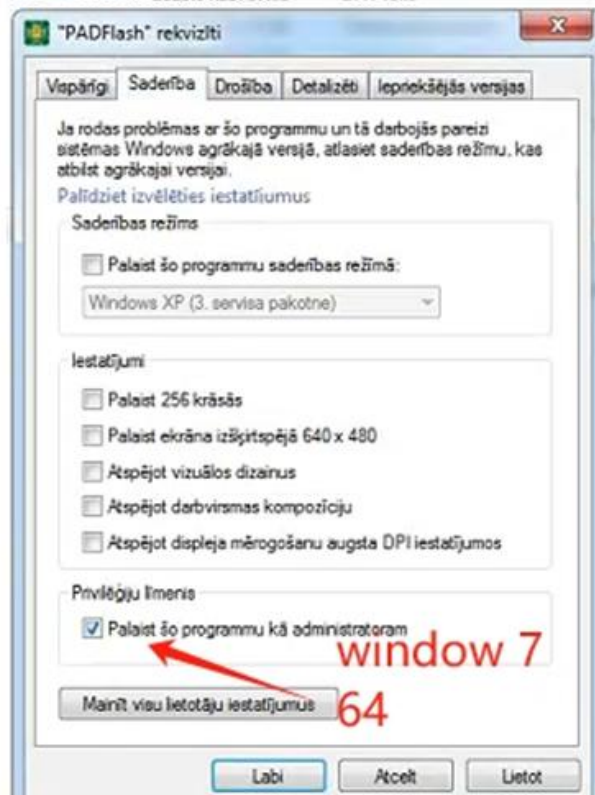

Find this padflash.exe

Set it as admin run mode

windows 10 64
system

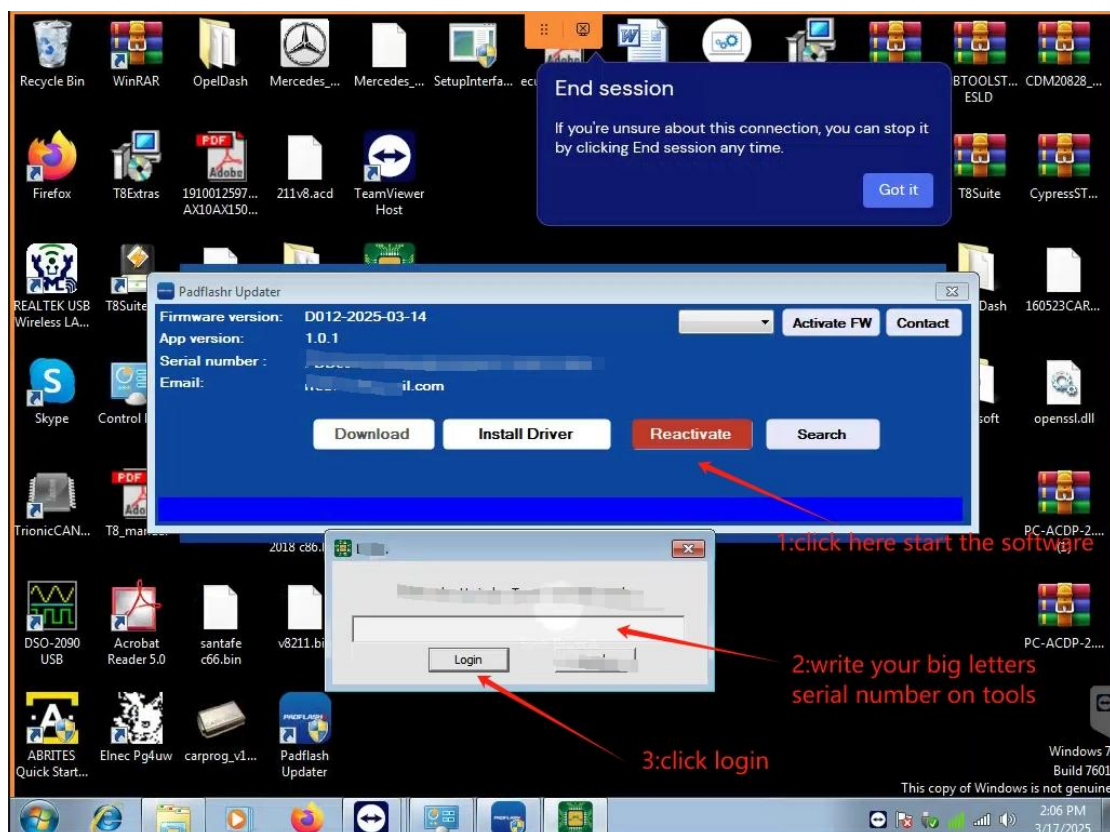

window 7
64

11: run the padflashr updater.exe software ,click the active (don't direct go to desktop run the padflash.exe), wait a little time , a windows will pop on,then write your tools serial number with big letters

After software open , click the activate the FW, it have the licens for your tools fireware

Every time you need click it activate FW when you close your software, it will upgrade the whole tools firEwarm every time when you close the software.

Notice :windows 10 and windows 11 must shutdown the defender fully , and turn off the real time scan , and all need do , if all of these you do , you cant let the tools work well and software running well , contact the remote support help you refresh your windows system , it must be the windows lack some patch .
